Specifications on Dry Maker Basis

Features and Benefits

- Rumen Nuts are a molassed cereal mixture supplemented with trace minerals and vitamins for feeding to all ruminants as an energy feed to complement pasture, hay or silage.
- A medium NDF rate to match different dry matter intakes and species.
- Natural energy is supplied from wheat and wheat-by products to further boost the value of this formulation in maintaining body weight and general performance when used as a forage supplement.

Feeding recommendations

- Introduced Rumen Nuts gradually to stock, in conjunction with hay, silage or pasture to encourage rumination and minimise digestive upsets often associated with concentrate feeding.

Species	Up to (kg/day)
Sheep	0.5
Cattle	3.0
Deer	2.0
Goats	1.0
Alpaca	1.0

Available in 25kg bags or delivered bulk.
