

# The Elite DAIRY RANGE

Nutritious & Yummy!

*"The feed for the top performing cows in New Zealand."*

**Purpose** A range of energy dense ruminant compound feeds, with three protein levels to complement the seasonal variation in pasture quality and quantity.

## Typical Nutritional Values

Product	% CP	MJ ME/kg	%NDF	% UDP	% Ca	% Mg
Elite 12%	12	12	16	1.2	1.3	0.89
Elite 16%	16	12	17	2.0	1.6	0.94
Elite 20%	20	12	17	4.0	1.5	0.90

*Specifications on Dry Matter Basis*

## Features and Benefits

- The Elite Dairy range contains a balanced range of macro mineral, trace minerals, vitamins and ionophores (on request) to meet the specific requirements of the high producing dairy cow.
- An ideal complement to pasture, maize silage or complete diet feed dairy cows.
- Nutritionally balanced for rumen fermentation, plus buffers to ensure the health of the microbial population.
- Low fibre pellet, with optimum levels of carbohydrate minimising substitution and maximising forage intake.

## Feeding recommendations

- Typical rate: 2kg/day.

Available in 25kg bags or delivered bulk.
