Specifications on As Feed Basis

Features and Benefits

- Horse pellets are a molassed cereal mixture supplemented with trace minerals and vitamins for feeding to all horses and pony's as a feed to complement pasture, hay or silage.
- A medium NDF rate to match different dry matter intakes and species.
- Natural energy is supplied from wheat and wheat-by products to further boost the value of this formulation in maintaining body weight and general performance when used as a forage supplement.

Feeding recommendations

- Pony and horses in light work - up to 1kg per day.
- Horses in heavy work - up to 3kg per day.
- Do not feed as sole diet.

Warning: Not intended or manufactured for feed to racing or competing horses.

Available in 25kg bags.

Nutritious & Yummy!
